I. CALLER ID DISPLAY

1. If you subscribe to caller ID services from your local telephone company, this telephone will show the call information on the display screen, and the current date and time will also be updated.
2. When the incoming call received, the number of new calls "NEW" and the total number of calls "IN XX" will appear on the display.
3. Press [UP] / [DOWN] key to view the incoming call number.
4. If the incoming call is a new calling, display will show as "NEW". And, the repeat calling will display as "REP".
5. Any error or corrupted information received, the display will show "---E---"
6. If the caller has exercised the option to prevent his name and number from being sent, "---P---" will be shown on the screen.
7. "---O---" will display, when some one calls from an area where the telephone company is not offering the caller identification services or an area that is not yet providing name and number delivery to your area via the long distance network.
8. When caller ID memory is full, it will automatically delete the oldest calls in order to make a room for the new ID number.

Note : The caller ID will only detect information between the first and second rings. You should wait for the second ring before picking up the phone or pressing the hands free button.

MAINTENANCE

1. Do not position in areas of high humidity, dust, high temperature, mechanical shock or strong sunlight.
2. Do not position in bathrooms or near water.
3. Do not disassemble the telephone, it contains no user-serviceable parts.
4. Do not place this product on an unstable cart, stand or table. The product may fall and causing serious damage to itself.
5. It is recommended to disconnect the telephone line from the wall socket during the thunderstorms, as lightning might seriously damage the telephone. The warranty does not cover damage caused by lightning.
6. Do not attempt to recharge the batteries that are used with this product.
7. All batteries should be replaced at the same time. Mixing fresh and exhausted batteries could increase internal cell pressure and rupture the exhausted batteries.

FAULT FINDING

1. No dial tone.
Make sure all connection of coil cord and line cord are connected securely to the jacks.
Check the telephone operation in master telephone socket. There may be a fault with the line in which case contact your network operator.
2. No display on the LCD.

Make sure the battery has put in the correct positions (+ and -) or replace another new alkaline batteries, and adjust the contrast level.

3. Do not ring.
Make sure the ringer switch setting on High position.
4. All the memories lose.
All the memories will be lost within 30 seconds, if the telephone line cord disconnected when the batteries replacing. Then, you have to program all memory banks again.
5. Caller name and number do not display.
Did you wait for the second ring before picking up the phone or pressing the hands free button ? The caller ID will only detect information between the first and second ring.
6. Contact your telephone company if the problem continues for more than 24 hours. The telephone company may be experiencing temporary line.
